

Abrasion Testing Machine**Model: IN-5600****Application:**

Abrasion test machine is mainly for alcohol / pencil / eraser abrasion test for coating surface or silkscreen printing of mobile phone, computer ETC electronic devices, to check the anti-abrasion ability and the adhesive ability of coating or silkscreen printing.

Features:

Abrasion tester can test abrasion with alcohol/eraser, and hardness test with pencil drawing at the same time. With many tester cap, jig, abrasion resistance tester is suitable for testing smartphone, laptop, keystrokes etc.. Digital display for speed, times, abrasion resistance test machine can adjust stroke under non- stop working. Pencil / eraser alcohol abrasion tester is adopt Japan precision component, low noise, durable using.

Specification:

Model	IN-5600
Testing stroke	5~50mm or Specified by user
Load	80~1000gf
Poise	10, 20, 50, 100, 200, 500kgf
Max supporting weight on table	5kgf
Testing speed	10~60 times/min (digital display)
Counter	1~999,999times (can be set)
Abrasion medium	Ethanol, Eraser, Pencil
Dimension (WxDxH)	400*450*760mm
Weight	45kg
Power supply	AC220V 50Hz 5A or specified by user

Appearance:
